Subject: Microsoft Settlement

Microsoft has suffered enough under the government s Anti-Trust lawsuits. A company marketing low-price and high-quality wares is being sued by the government for driving its competitors into the ground with lower prices and free extra applications. Isn t this what capitalism is all about??? This madness needs to stop we are punishing people if they are successful in life! I hope you consider that by making this settlement happen you are also helping to solidify the stock market also. Since the crusade against Microsoft began 4 years ago its stock has been tumbling bringing along with it the Dow Jones.
